

THE MOST ADVANCED LINEAR CEILING SYSTEM

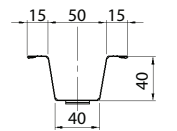

SPAC DECKFORM

- Special Acoustic Ceiling Deckform -

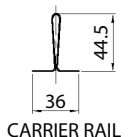

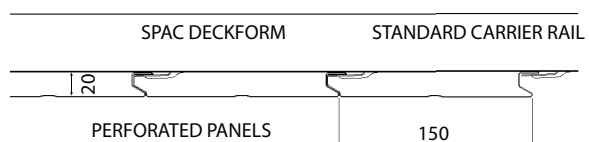

The SPAC Deckform system was developed to cater for the needs of Architects and Designers desiring an inaccessible system with the optimum of resistance to vandalism or abuse. Manufactured from 0.75mm Zincalume steel in a 150mm wide module system. For those applications not demanding high security requirements, SPAC Deckform system can be produced in a 0.55mm BMT, providing a more economical option. Each face panel interlocks one to another and is supported by a concealed carrier system providing an attractive monolithic appearance. The system has been used in Prisons, Correctional facilities, Public Changerooms, Sports Stadiums, Bus and Rail Stations providing a high degree of security and protection of assets and services. SPAC Deckform is available in perforated forms and various finishes such as Colorbond, Baked Enamel, Powder Coat or Clear Lacquer over Zincalume.
