

MINISTRIP BROADLINE

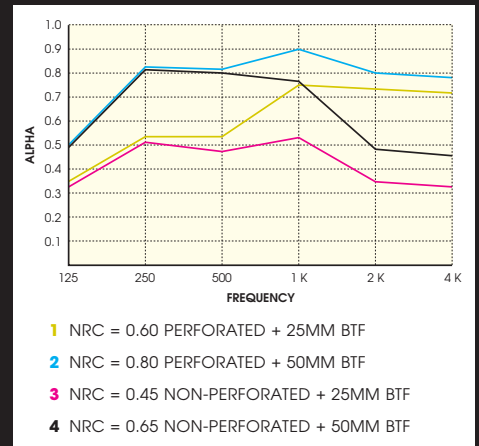

Ministrip has proven to be the most successful linear ceiling system in the Australian market today. This is achieved through providing an economical system with features such as Acoustic and Thermal control, pre-finished strips, a pleasing aesthetic, strength, durability, quick installation and no wet trades required.

The Ministrip system is a low profile, open style with a 75mm module available in a selection of finishes; Colorbond, Powder Coated, Clear Laquer over Zincalume Steel base metal. Ministrip offers a high degree of impact resistance and is suitable in a wide range of applications. The face panel is available in non-perforated or a variety of perforation options.

For over 40 years Ministrip has proven to be a popular choice for use in education buildings across Australia.
