

ACS ENDURAWOOD

Timber finishes that are more enduring, fire resistant and maintenance free. ACS has added to it's range of metal acoustic ceilings and claddings with natural timber looks over it's range of steel and aluminium products. Short lead times, cost effective and environmentally friendly.

ACS ENDURAWOOD CLADDING SYSTEMS

ACS Deckform and Profile 230 systems provide two different types of maintenance free cladding.

Deckform provides a continuous flush monolithic 150mm wide cover which is fixed to purpose punched carrier rail or flat strip. Perforated also available.

Profile 230 is a 12mm low profile deep ribbed system that creates a shadow line detail with 230mm coverage. Both panels available up to 6.5m.

ACS DECKFORM

ACS ENDURAWOOD LINEAR 5

Linear 5 provides decorative and functional acoustic ceilings through its open linear aesthetic. Linear 5 is available in lengths up to 6.5m and can be used in a curved or raking situation providing more design opportunity.

It's low profile and 100mm module system creates an effective timber slat effect that can be perforated or plain with a minimum of .7 NRC features with black insulation backing. Contact us for our acoustic reports.

ACS LINEAR 5

ACS ENDURAWOOD FORMS

Forms also provides a decorative and functional acoustic ceiling with 23mm depth and close alignment as an alternative timber batten effect.
